Ambalika Institute Of Management And Technology

May 2022 – May 2025

B.Tech - Computer Science Engineering | CGPA: 6.03

Lucknow, India

Ambalika Institute Of Management And Technology

May 2019 – May 2022

Diploma - Electronic And Communication | 74%

Lucknow, India

PROJECTS

Stylehive — An Ecommerce Platform [🔗](#) | React.js, Node.js, Express.js, MongoDB, Razorpay Aug 2025

- Developed a **full-stack e-commerce web application** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js), delivering a scalable and responsive shopping experience with **Tailwind CSS** for modern UI design.
- Architected and implemented **RESTful APIs** with **Express.js** and **Node.js** to handle product listings, user authentication, cart management, and order processing workflows.
- Integrated **Razorpay payment gateway** to enable secure, real-time online transactions, supporting seamless checkout flows and payment verification via **webhooks**.
- Designed and managed **MongoDB database schemas** for users, products, orders, and inventory, optimizing queries for efficient data retrieval and application performance.
- Built dynamic, **component-driven frontend** with **React.js** and **Tailwind CSS**, ensuring fully responsive layouts and an intuitive user experience across all device sizes.

WRITIUM — A Blogging Platform [🔗](#) | React.js, Tailwind CSS, Hono, JWT, Cloudflare Sep 2025

- Developed a **full-stack blogging platform** using **React.js** and **Tailwind CSS**, featuring a custom **Rich Text Editor** for seamless content creation, editing, and publishing workflows.
- Implemented **secure user authentication and authorization** using **JWT (JSON Web Tokens)**, protecting access to writing, editing, and content management features.
- Built and integrated **RESTful backend APIs** for **blog storage**, **image upload handling**, and real-time content updates, improving platform reliability and functionality.
- Designed **responsive and accessible UI components** with **Tailwind CSS**, enhancing readability, writing workflow, and cross-device user experience.
- Deployed backend on **Cloudflare Workers** using **Hono framework**, achieving **edge-optimized request handling**, low latency, and high-performance API responses.

UBUNTU OS PORTFOLIO [🔗](#) | React.js, Tailwind CSS, EmailJS, JavaScript May 2025

- Developed an interactive **operating system-style portfolio** web application using **React.js** and **Tailwind CSS**, modeled after Ubuntu OS to deliver a unique desktop-like user experience.
- Engineered reusable **React components** for functional OS features including **app launcher**, **terminal emulator**, **music player**, and **project showcase windows**, replicating real system behavior.
- Implemented **window management system** with maximize, minimize, drag-and-drop, and close functionality using **React state management**, ensuring seamless UI interactions.
- Built a **responsive, animation-rich UI** with smooth CSS transitions and consistent component behavior, delivering a polished, modern, and cross-device compatible interface.
- Integrated **EmailJS** for contact form submission and organized **projects, experience, and resume** into a structured About section for easy navigation.
